adrianolleshi1@gmail.com

Dear Sir or Madam,

With more than six years of professional experience in cybersecurity and a master's degree in information and communication technology, I have developed strong expertise in Threat Hunting, Threat Intelligence, Security Research, and Digital Forensics & Incident Response (DFIR). My career reflects both deep technical knowledge and the ability to align security initiatives with strategic objectives to National CSIRT and CERT team.

Currently, I serve as Cyber Security Consultant at Axiom Breach and as Director of Cyber Security Analysis at the National Authority for Cyber Security. In these roles, I have led national-level incident response operations, conducted advanced malware analysis, and participated in NATO-aligned cyber defense exercises. I bring strong expertise in leveraging both open-source technologies and commercial solutions such as *Microsoft Sentinel*, *CrowdStrike* to deliver effective detection, monitoring, and response strategies. My leadership in Purple Team and Blue Team, development of open-source threat intelligence tools, and coordination of international cyber drills has directly contributed to enhancing the resilience of critical infrastructures.

Throughout my career, I have consistently combined hands-on technical work with the implementation of structured methodologies such as MITRE ATT&CK, Kill Chain analysis, and SOC best practices, ensuring scalable and resilient security architectures. I hold multiple industry certifications, including *EC-Council Certified Incident Handler (ECIH)*, *CompTIA Security+*, *ISO/IEC 27001 Lead Auditor*, and *OffSec Threat Hunter (OSTH)*. These credentials, together with my published malware analysis reports and threat research, demonstrate advanced capabilities in *reverse engineering* (x64dbg, IDA Pro, Ghidra), *malware analysis* and dynamic analysis (Cuckoo, Any.Run), *dark web intelligence gathering*, *adversary tracking (Security analyst)*, and the orchestration of SIEM solutions (Microsoft Sentinel, ELK Stack, Security Onion) for threat detection and incident response.

My efforts have been recognized through multiple achievements, including: 1st Place in Global Cyber Drill, GISEC 2024; 1st Place in the Balkans Live-Fire Cybersecurity Exercise 2025; 1st Place - Western Balkans Cyber Drill

I am excited about the opportunity to contribute my expertise in Threat Hunting, DFIR, and Threat Intelligence to your mission. Thank you for your time and consideration, and I look forward to the possibility of discussing how I can add value to your team.

Warm regards,

ADRIANO LLESHI
